

ESCAPE THE MOB ONLINE

Teams race to complete a variety of escape room style challenges in this captivating mobile device-based escape game.

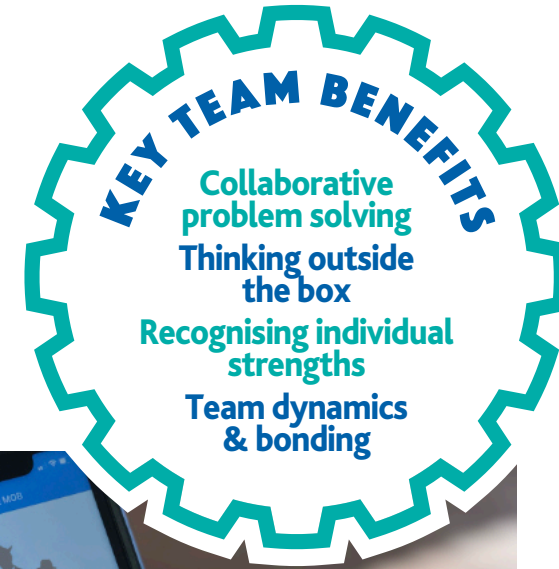

How it works

Using an online conference platform, Escape the Mob begins with a mysterious video telling teams that they are incriminated in the perfect heist.

After an initial briefing from the online facilitator, our Escape the Mob app leads teams through a series of challenges to complete; a variety of photos, videos, cryptic questions and riddles, which will give them clues to the ultimate solution. Challenges will draw on the latest Escape Room style quests including ciphers, symbol swapping alpha puzzles, searching for objects in images, and more! The winning team is the team with the most points, but there is also shared jubilation as the teams must ultimately collaborate to clear their name.

Learning outcomes

Escape the Mob is a totally inclusive and highly engaging team bonding activity. With a limited amount of time, a competitive theme and a variety of challenges including photo, video, cryptic questions, ciphers, symbol swapping alpha puzzles, pattern identification, mysterious sounds and theatrical performances, teams must combine their different skills and develop creative solutions to solve the mystery. Collaboration comes into play in the final moments to ultimately crack the final code and Escape the Mob!
