

GLOBAL INNOVATION GAME

Teams generate brilliant new ideas, pitch and invest in this fun dragons' den style game.

How it works

Organise: Cards are dealt to each team, ensuring an even mix of Object, Tech & Data cards.

Innovate: Team members choose a card of each colour & create a Smart Object or Service or Tool.

Validate: Each team picks the idea they think is the best, they validate the chosen team idea and then create a two minute pitch.

Pitch: All Teams pitch their idea to the room.

Invest: Teams invest game money on the idea they like most.

Learning outcomes

Global Innovation Game has been developed out of a need to step away from everyday tech devices. Our millennial generation have inspired its creation. Global Innovation Game brings it back to basics, gets everyone openly talking, creating ideas and innovating without the aid of search engines, PowerPoints and screens. It is a fun and rewarding event that encourages creativity and rewards those who are most innovative.

Key business benefits

- ✧ Stimulates creative thinking
- ✧ Fun unifying team bonding
