

# QUICKFIRE

Highly engaging app based game of mental, physical & creative challenges focusing on individual difference and risk & reward.

## How it works

Each team starts with a tablet, a box of equipment and some game currency. Their quest is to successfully complete as many challenges within a given time frame. The mental, creative and physical challenges are in varied difficulty levels and forms - photo, video, single answer, multiple choice, logic puzzles and more! Teams select the challenges they can complete successfully being mindful that each has a cost and reward. As time elapses the pace and risk taking builds creating an extraordinary atmosphere of fun, laughter and urgency. The winning team crowned the victor.

## Learning outcomes

With limited time, individuals must throw away inhibitions and have confidence in their strengths. As time progresses the team realises the strengths of each individual, build trust and confidently take on increasing risk for reward. Pair and group challenges require innovative thinking, effective communication skills and collective shared strategy culminating in swift uninhibited action. Quickfire is a lot of laughs! It leaves teams with a feeling of exhilaration and oneness! And, most importantly individuals have learnt to appreciate their own strengths and the diverse skills of others in their team.

## Key business benefits

- ✧ Appreciate individual difference
- ✧ Effective communication
- ✧ Memorable shared experience
- ✧ Risk & reward strategising
